WHAT IS CREDIT?

Credit is when a bank agrees to buy a product for you and trusts that you will pay the money back over time.

Credit can be in the form of a **credit card** or **loan** that lets you buy something expensive such as a boat, a car, an education, or even a home.

In order to get **credit** you have to **apply** for it. The bank will give you credit if you are approved. But first they have to run a **credit report** to find out how you've handled money in the past.

There are other factors that go into getting approved for a loan. You should also know that the bank will put a **limit** on how much you can spend/borrow to protect you from taking more than you're able to pay back. If the bank decides to offer you credit, you may have to pay a fee every year to use this service.

The bank lends you money because it gives them an opportunity to earn money. If you decide to take a long time paying back the money you borrow, you have to pay back extra which is called **interest.**

WHAT IS A GREDIT REPORT?

A credit report is a statement that has information about your credit activity and current credit situation such as loan paying history and the status of your credit accounts.
